## Professional Summary

Results-oriented Senior Software Engineer with over 20 years of experience leading front-end architecture, web development, and team collaboration across mission-critical applications. Proven expertise in designing scalable, responsive user interfaces using JavaScript/jQuery. Adept at collaborating with cross-functional teams, mentoring developers, and delivering customer-focused solutions aligned with observability, performance, and accessibility goals. Strong advocate for Agile practices and cloud-native solutions using SharePoint. Passionate about building intuitive UI experiences that drive real-time insight and operational excellence.

## Professional Experience

**Staff Software Engineer** – SAIC (Feb 2019 – Present, Remote)

- Lead design and implementation of scalable frontend solutions using JavaScript, HTML, and CSS.
- Architect and deliver enterprise-wide web automation tools to improve application reliability and performance.
- Mentor junior engineers and drive frontend code quality, testing practices, and peer reviews.
- Leverage Power Platform and Azure to deliver productivity-enhancing tools for cross-departmental clients.
- Champion Agile development methodologies and contribute to UI/UX design discussions with stakeholders.

**Web Consultant** – Self-Employed (May 2009 – Present, Miami, FL)

- Designed and implemented multiple front-end widgets and components backed by a custom PHP API; created the graphics and UI/UX for a cohesive user experience.
- Deliver full-stack JavaScript and PHP solutions with emphasis on modular frontend interfaces and CMS integrations.
- Built and deployed a secure video content delivery platform for online education using custom APIs.
- Implemented responsive UI designs and performance optimizations for clients across industries.
- Customized CRM and CMS tools with focus on intuitive UX and extensibility.

**Product Owner** – Bamboo Solutions (Aug 2017 – Feb 2019, Remote)

- Directed feature planning and frontend architecture for cloud-based enterprise web tools.
- Collaborated with engineers, designers, and QA to ship new UI features supporting user observability.
- Facilitated Agile ceremonies and contributed to sprint planning, retrospectives, and velocity improvements.

**Managing Consultant and Software Engineer** – SharePointXperts (Mar 2014 – Aug 2017, Remote)

- Led frontend development of custom SharePoint web applications, including responsive dashboards.

- Worked with NoSQL and relational databases for robust data-driven UI components.
- Mentored junior engineers and reviewed code for adherence to accessibility and usability standards.

**Assistant Director of Technology / Web Software Engineer** – Florida International University (Dec 2009 – Feb 2014, Miami, FL)

- Directed the development of 20+ responsive and accessible university websites using JavaScript and PHP.
- Collaborated with designers, analysts, and business leads to align web applications with organizational needs.
- Developed reusable frontend components and guided developers in best practices for clean, testable code.
